SCHOOL ACCREDITATION
1987-88

The Education Reform Act of 1982 created a performance-based accreditation system and made state accreditation a mandatory process for all public school districts. The performance-based system emphasizes outcome measures rather than quantitative factors and is designed to accredit school districts rather than individual schools. During school year 1987-88, the performance-based accreditation system was implemented, and the Commission on School Accreditation awarded an accredited status to each of the 152 public school districts and the four agricultural high schools representing a total of 873 schools. The state accreditation system remained voluntary for nonpublic and special schools in the state. The majority of the nonpublic schools are parochial, and the special schools are those established to serve special needs of students. During the 1987-88 school year, the Commission on School Accreditation received applications from and subsequently accredited 60 nonpublic schools and 21 special schools.

NOTICE - Due to revisions, data in the table above are not comparable to those previously published. Please see source to obtain further explanation and revised historical data.

[1] Data covers 181,100 full and part-time production workers in manufacturing, 6,000 non-supervisory employees in electric services, and 12,500 in banking who worked during or received pay for the payroll period including the 12th of the month. The average earnings are "Gross", that is, they reflect not only changes in basic hourly and incentive wage rates, but also such factors as premium pay for overtime work and shift differentials. The workweek information relates to average hours worked or paid for and is somewhat different from scheduled hours because of such factors as absenteeism, labor turnover, part-time work, overtime work and stoppages. These series are prepared by the Mississippi Employment Security Commission in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

[1] Vehicles of the civilian branches of the Federal Government are given in this table. Vehicles of the military services are not included.

[2] This information, compiled chiefly from reports of state authorities, is incomplete in many cases. Some states give state-owned vehicles only; others exclude from registration certain classes, such as fire apparatus, and police vehicles. For the states not reporting state, county, and municipal vehicles separately from private and commercial vehicles and those reporting unsegregated totals only, classification by vehicle type has been approximated on the basis of other available data.

The number of courts reporting to the Department of Public Welfare affects the total children's cases and consequently the comparability from year to year of youth court statistics. Courts from only four counties (Bolivar, Hinds, Pike, and Warren) have reported one or more cases for each year from 1950 through 1972. The size of the courts not reporting also influences the total cases.

Because of many limitations the trend table does not show the extent of delinquency or neglect in this state and may be particularly misleading if only total number of cases is used to make comparisons between years.

[1] States can report three estimates of prison capacity; rated, operational, and design. Some states report fewer estimates or the same number for all estimates. Excludes persons housed in local jails.

[2] Jurisdiction counts exclude prisoners held in jails because of crowding.

[3] Numbers are custodial, not jurisdictional counts.
